## DETAILED ACTION

### *Double Patenting*

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 61, 69 and 135-137 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 23-25 of prior U.S. Patent No. 6,762,304 B2. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

3. Note that the claimed compounds and the patented compounds were made by the same process, although the catalyst used in the process was different. Therefore, the claimed compounds and the patented compounds are the same. Thus, the claimed and the patented subject matter is the same.

Art Unit: 1621

4. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 28, 29, and 47 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 30-34 of U.S. Patent No. 6,410,746 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because the examined claims are either anticipated by, or would have been obvious over, the reference claims. Claims 30-34 of U.S. Patent No. 6,410,746 B1 recites a method of making a compound of the formula

by reacting a diazo compound of the formula

with a compound of the formula

in the presence of a bis-transition metal catalyst. The method of claims 28, 29 and 47 differ from claims 30-34 in the scope of the variables R<sup>31</sup> and R<sup>32</sup>. Claims 30-34 exclude compounds where R<sup>31</sup> and R<sup>32</sup> together with the atoms to which they are bonded, form a 5-12 membered ring.

However, at column 8, lines 47-52 of U.S. Patent No. 6,410,746 B1 discloses that the variables R<sup>31</sup> and R<sup>32</sup> can also embrace the formation of a 5-12 membered ring. Thus, one skilled in the art would be motivated to react compounds where R<sup>31</sup> and R<sup>32</sup> can also embrace the formation of a 5-12 membered ring with the diazo compound based on the disclosure of the '746 patent.

***Allowable Subject Matter***

6. Claims 30-36, 51-59 and 125-134 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
